

## **Boris XML Transfer 2.0.0**

**April 15 2010**

### **Release Notes**

Please visit our web site at [www.borisfx.com](http://www.borisfx.com) for complete detailed information regarding the new filters and features that are included in this product release.

### **Boris XML Transfer supports the following host applications:**

Apple Final Cut Pro 6 and above

### **System Requirements:**

Macintosh:

Max OSX 10.5 and higher

### **New with this version:**

- Fixed issue with roto bezier in FCP's Garbage Matte effect where four and eight point garbage mattes were unexpectedly being translated into roto Bezier style masks with curved sides instead of maintaining the straight, non-curved sides from FCP. This problem is fixed and garbage mattes now appear as expected when transferred from FCP into AE.
- Fixed issue with Audio Pan where an audio channels pan setting was not being maintained. This is fixed and audio channel pan settings are now preserved as expected from FCP to AE.
- Fixed Drag and Drop function for XML files for both CS4 and CS5 – in the previous version of the software, dropping an exported XML file onto AE failed to generate an action. This has been fixed, and AE now accepts the dragged and dropped XML file as expected.
- Fixed several problems with Constant Speed on untrimmed clips. Use of the Constant Speed effect in FCP now yields the expected result when the sequence is transferred into AE.

### **Registration and Technical Support**

Make sure to register your product in order to receive the latest technical and upgrade information. Registered users are often eligible to download free filters from the Boris FX website. Any free filters will be available on the Downloads page at [www.borisfx.com](http://www.borisfx.com).

You can register online at <http://borisfx.com/support/register.html>. We offer registered users one year of free technical support starting from the date of purchase.
